

INDUSTRIAL FIBERGLASS HANDRAIL SYSTEMS

*** ROUND ***

Round Handrail System

The SAFRAIL™ round handrail system is a round fiberglass system that is ideal for any high traffic area where handrail is needed.

- The round rails are easy to grip and 90° molded corners eliminate sharp edges.
- The handrail system meets OSHA strength requirements with a 2:1 factor of safety with a 5-foot (1524mm) maximum post spacing.
- The handrail system can be made to comply with ADA standards upon request.
- Internally bonded fiberglass connectors result in no visible rivets or metal parts.
- Rail and posts are 1.90" (48.3mm) O.D. x 1.51" (38.3mm) I.D. This is the same outside dimension as typical metal rails for ease of adapting to common metal brackets.
- Kick plates are available.
- The SAFRAIL™ round handrail system is pultruded using either a vinyl ester or a polyester resin system.
- The handrail system includes a UV inhibitor for additional resistance to ultraviolet degradation and corrosion. Standard colors safety yellow or grey. Special colors available.
- All components secured with epoxy.
